

# RefReps

Iteration Days: 2 Electric Boogaloo

# Mentor Feedback

- Mid-iteration:

Suggested members specialize in certain areas in the project rather than everyone trying to do everything

- End of iteration:

Suggested to keep the projects organized going into later iterations, either changing the structure or using virtual folders

# Client Feedback

*“You guys are crushing it”* - Braden, Refreps LLC

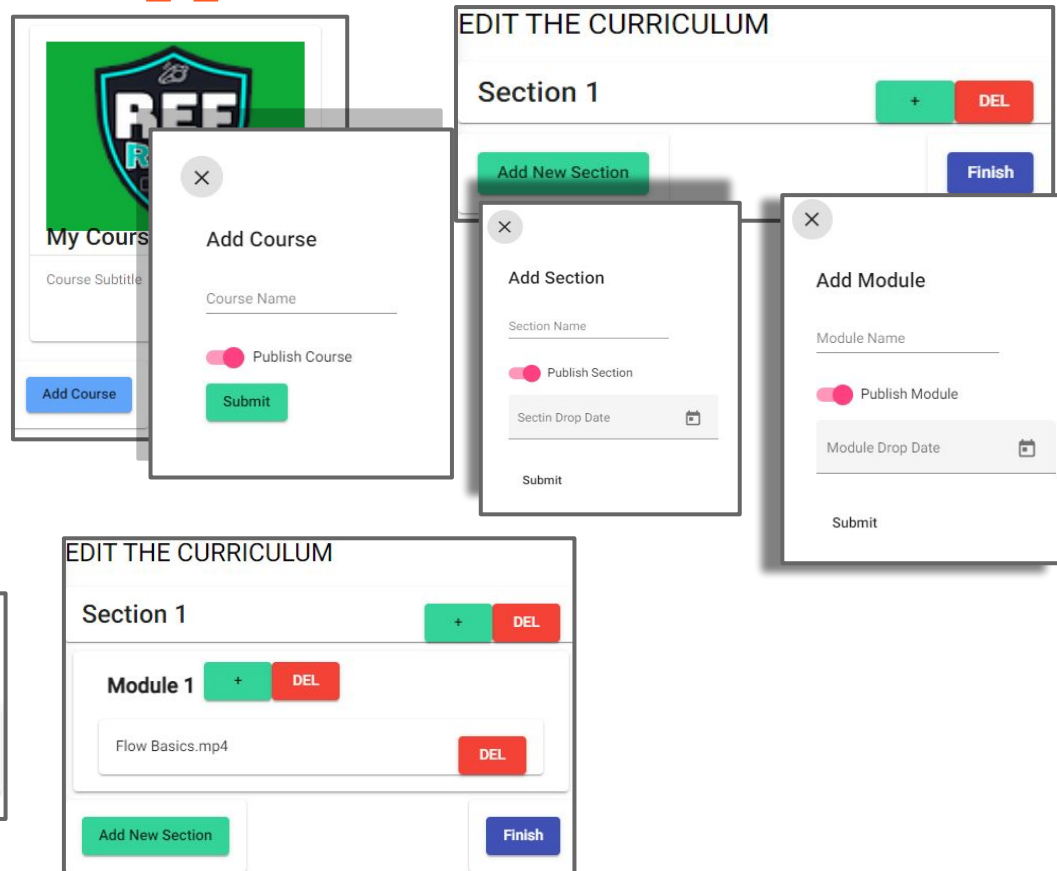

- Would like to see course and video enforcements
- Like to see quiz creation and grading
- Take a look at their Teachable to design our future components to be similar in features, such as enforcements and progression requirements

# Existing Iteration 1 “Feature”

- File uploading in a content within a course (only uploaded and saved metadata in the db)
  - The video was not viewable in the application

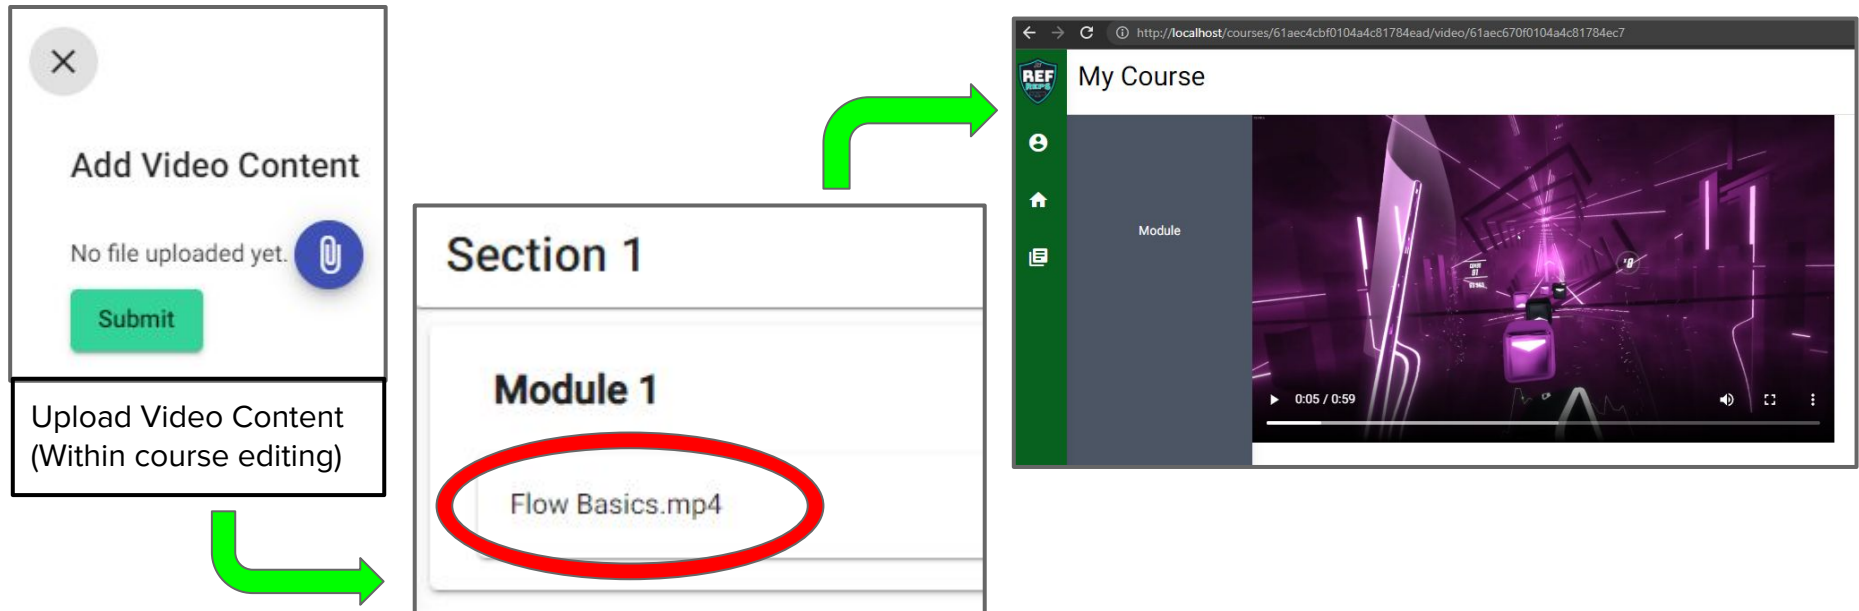

# Iteration 2 feature: In-app Course Creation

- Make a new course
- Add a new section in a course
- Add a new module in a section
- Add content in a module
- Delete sections

# Iteration 2 feature: Video Streaming

- Uploading videos to local storage
- Stream videos by accessing through course content

# Iteration 2 feature: Drag-and-Drop Reorder

- Highly requested client feature.
- Ability to reorder elements of a course with mouse.
- Can change the order of sections, modules, and content within a module by dragging and dropping

# Planned Iteration 3 Features

- Quiz creating, taking, grading, and reporting
- Separating Views
  - Admin/Student/Instructor
- Surveys
- Section and video enforcements
